NEW TRAINING VIDEOS

Vol. 8, MMIX

We will soon be uploading training videos that were shot in our new office expansion. The First of these training videos features "How to correctly swag a cable", our instructor, Pat Bash, goes over such things as the "Go/No Go gauge" and dos and don'ts of using a Nicopress. The second in our series of training videos "How to correctly use Pro-Grips", using our Pro-Banner Clamps, Pat shows you how to feed the cable through the Pro-Grip and how to effectively use the Pro-Grip to hang, as well as how to make adjustments to get your banner level. See these two, as well as many more training videos to come, visit our website at www.in-houseproduction.com or become a fan of our group on [Facebook](https://www.facebook.com/inhouseproduction).

ON THE JOB

Our guys are working on a permanent lighting grid install at one of the new hotels in Las Vegas. After pulling countless permits, going through rigorous inspections and creating booklets with welding procedures and safety meeting logs, the first of eight grids was installed.

Check out our blog to see more pictures of this install and of our many other jobs.

FEATURED PRODUCT

Pro-Square Screen Clamps

Need to hang and adjust a screen and need it done quickly? Our square clamps are designed to fit around 1" or 1¼" square tubing/fast fold screens, with our Pro-Grip and ½" aircraft cable. This little efficient tool can not only save you time, but also save on your labor costs. Inquire with any sales representative at In-House today to get yours.

MATERIAL HANDLING

Our install crews have just finished pallet racking for Clark County Library, Swisher Sanitary and Erickson Manufacturing. We were awarded the contract to install all racking for all 59 floors for maid service and storage for the Aria Tower, which our managers are planning our attack on this project. We finished 35 dock levelers at City Center and partially due to too many trades working in a confined space, we have one more Special Order Dock Leveler to install into a pit that was smaller than the other 35 docks.

If you have the racking that needs installed, we have the labor to install it.
