### Why use In-House Production?

At In-House Production our job, quite simply, is getting you the labor you need.

When it comes to running your event, no one knows better than you. You imagined it, planned it, scheduled it, organized and published it, trucked and/or shipped it. Now all you need is the right labor - and that's where In-House production comes in. Whatever the event - industrial and corporate trade shows, conventions, concerts, theatrical productions, theme parties, special events - we can supply the right qualifications and the right experience. Once you know what you need, In-House Production will deliver a qualified professional crew, reporting to and responsible to you, and your staff. Or we can also provide/assist you in the planning of your event.

### Featured Job:

#### Burning Man

Burning Man, the annual art, music and everything-else festival in the Black Rock Desert in Nevada, is the most popular ever.

The largest outdoor arts festival in North America is in its 27th year, with as many as 68,000 people expected to part-take in partying, debauchery and excess before it all ends for another year on Labor Day. Organizers stress it's mostly up to participants to decide what Burning man is.

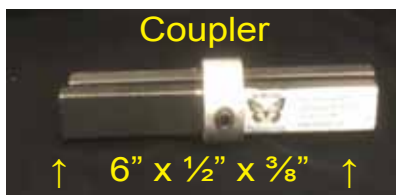

When the Organizers discovered that this piece, did not work, they called on In-House production to repair this piece. We were able to determine the motor was faulty, we replaced it, and the celebrations continued.

### Featured Product:

#### Pipe Pecker

What's a Pipe Pecker! And what does it do? It is a coupler and corners that quickly join two pipes together. With our 90° elbow and our 3 way blind corner you can create long banner pipes, stair rails, or header to a truss. No threading is required, a 1/4" Hex Key is all that required.

Call (702) 631-4748 for more details.
